

On The Leading Edge of Technology

Technological advances in Fluid Power products are keeping IC-Fluid Power, Inc. a dynamic and competitive source for the North American market. Many of the technological advances are found in European designed components, where the industry has its roots. Since 1989, IC-Fluid Power, Inc. has been bringing European technology and application expertise to North America. IC-Fluid Power, Inc. provides distribution, technical support and repair for all European engineered product lines.

Our products and services are sold direct and through a network of Distributors and Sales Representatives throughout the United States, Canada and Mexico. We maintain a technical support team to assist you with unique hydraulic system challenges. Our Customer Satisfaction Team is trained to respond to your application needs.
