

# Tool Intensifier

## MP-TI-5.0

### Specifications

Min Inlet Pressure  
1850 PSI  
128 BAR

Min Inlet Flow  
0.8 GPM (3 LPM)

Max Inlet Flow  
9.2 GPM (35 LPM)

High Pressure Port (HP)  
3/8 NPT

Low Pressure Inlet Port  
3/8 NPT

Low Pressure Return Port  
3/8 NPT

Control  
Single Acting Spring Return

Mounting Brackets  
Included (Adjustable)

Couplings  
Not Included

Safely intensifies the available hydraulic pressure from your truck to power your 10,000 PSI hydraulic tools

up to  
**700 PSI**  
Backpressure

**10,000 PSI**  
(609 BAR)  
Max Operating Pressure

**50 lbs**  
W **11.5"** x H **15.5"**

### Features

- Boosts the hydraulic tool circuit in utility trucks up to 10,000 psi, with inlet pressure as low as 1,850 psi
- Built-in pressure intensifier, single acting control valve, pressure regulator, and safety relief valve
- Ensures high level of precision and safety for the operator
- Designed for simple, one-handed operation, with a pressure gauge for consistent results, every time
- Fast advance and return times, designed to perform in systems that have up to 700 psi backpressure
- Mounting bracket with adjustable feet included
- Designed for continuous usage and life in the field
